Maksym Ivashchenko

Senior Frontend Developer

I have extensive experience taking full ownership of new products and features, effectively self-managing and leading small, geographically distributed teams. With 7 years of experience in frontend development, I've honed my skills to deliver high-quality, user-centric solutions.

Experience

Aug 2023 – present: Andor Health, FL, USA – *Front End Engineer*

- *Revamped the system design of a React application, including state management, component composition, naming conventions, and other best practices*
- *Enhanced a crucial feature of the video conferencing module, making it more robust and maintainable*
- *Provided mentorship to fellow developers, offering guidance on fundamental UI system design concepts*

Sep 2021 – Sep 2023: Demandbase (TEAM International, Inc.), CA, USA – *Senior Front End Developer*

- *Implemented major feature as Lead Engineer, retained support/maintenance ownership*
- *Responsible for distilling PRD into Technical Design Document*
- *Developed React based architecture for new large-scale application modules*
- *Implemented best practices for React to ensure clean and efficient code*
- *Resolved complex issues related to application frontend*
- *Analyzed existing code and identified areas for refactoring and improvement*
- *Developed expertise in required testing technologies, taught other team members*

Oct 2021 - Feb 2023: Yotpo (AllStarsIt), Israel – *Senior Frontend Developer*

- *Migrated legacy AngularJS code to Angular framework without impacting UX*
- *Owned the end-to-end development process from product definition to production*
- *Developed automated and manual E2E, unit tests, and integration tests*
- *Ensured pixel perfect implementation of design specifications*
- *Resolved conflicts between teams and managed difficult tasks to meet tight schedules*

Mar 2021 – Sep 2021: Auditdata, Denmark – *Frontend Engineer*

- *Merged separate legacy services into one product using React, iframes, post messages*
- *Rapidly developed required additional services using React*
- *Participated in code reviews and ensured adherence to standards and best practices*
- *Implemented responsive design and cross browser compatibility*

Mar 2020 – Mar 2021: MapR (Cyber Vision, Inc.), USA – *Frontend Engineer*

- *Developed new application features as part of small team*
- *Ensured that new features met project goals and requirements and delivered on-time*
- *Refactored code for various parts of the application to improve performance*
- *Implemented best practices for React to ensure clean and efficient code*

May 2018 – Feb 2020: Citibank (Luxoft, DXC), USA – *Software Engineer*

- *Collaborated with client team to develop frontend features for various projects using React, typescript, and custom webpack configurations*
- *Analyzed project goals and requirements and contributed to the design and architecture of new projects, optimized for performance and scalability*

Mar 2017 – May 2018: ReverseSide, Ukraine — *Junior Frontend Developer*

- *Worked with design team to create css layouts with animations and user-friendly landing pages that are responsive across different devices/screen sizes*
- *Developed basic Javascript functionality to add frontend interactivity such as form validation, animations, and other client-side features*
